BOMB SHELLS.

A Dangerous Collection of War Time Relics.

H. L. Sanders and James Force Killed While Extracting Powder.

From Bomb Shells, Which Explode—The explosion sets off other shells, causing a row like that of a runaway—men—strange and bad accident.

FRANKFORT, Ky., July 19.—A horrible catastrophe occurred about two miles and a half from this city, near the turnpike road to Louisville. The state had sold a large quantity of shells and loaded shells, which accumulated at the arsenal in war times, to a Louisville junk shop as old iron. The Louisville firm extracted H. L. Sanders and James Force to unload the shells, agreeing to give them the powder and some pay besides. The men hauled the ammunition to a point near Frankfort, and commenced work under a fly.

Monday about half past 11 o'clock, while the men were alone at work in the improvised tent, a tremendous explosion was heard. A laborer at work in a field nearby rushed to the tent and found both men torn limb from limb and their bodies perforated and mangled with small shot and slugs from the exploded shell. The tent had caught fire and fallen in upon the unfortunate victims, and the explosion had scattered a number of other shells. The laborer dragged the dismembered bodies from the tent and carried them to a place where the explosion was heard.
